EDUCATION

NBN Sinhgad School of Engineering, Pune 2022-2026
Bachelor of Engineering in Information Technology

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL, HTML5, CSS
- **Technologies/Frameworks:** React.js, Node.js, Express.js, REST API, MongoDB, Spring Boot
- **Core Subjects:** OOPS, DBMS, Operating System , SDLC, Automation Scripting, Playwright
- **Development Tools:** Git, GitHub, Postman, VS Code, IntelliJ IDEA, Jupyter Notebook

PROJECTS

ExpenseTracker – Personal Expense Management App (Link) Oct 2026
Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, Recharts, Tailwind CSS

- Engineered a MERN-based expense tracking application with 3 core capabilities: adding, categorizing, and monitoring personal expenses in real time.
- Implemented secure JWT-based user authentication and designed REST APIs supporting 4 CRUD operations for expense management.
- Built an interactive dashboard combining 2 features — Recharts-powered category-wise visualizations and one-click Excel export of transaction history — for at-a-glance spending insights.

BrezzyDrive Rentals – Car Rental Management Platform (Link) Jul 2025 – Jun 2026
Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, ImageKit

- Engineered a MERN-based vehicle rental platform with 3 core features: vehicle discovery, booking management, and customer reviews.
- Enforced JWT-based authentication and role-based access control across REST APIs spanning 4 resource modules: users, vehicles, bookings, and admin operations.
- Created an admin dashboard and integrated 2 cloud services — MongoDB Atlas and ImageKit — for scalable data storage and media management.

Smart Electricity Bill Predictor (Link) Sep 2026
Tech Stack: Python, Scikit-Learn, Flask, Pandas, NumPy

- Developed an ML-based web application to predict household electricity bills using 3 input signals: consumption patterns, tariff rates, and appliance usage data.
- Executed data preprocessing, EDA, and feature engineering on the dataset, benchmarking 3 models and achieving average prediction error MAE of ±15 (R^2 0.99) with Gradient Boosting.
- Built and deployed a Flask-based application with real-time prediction APIs and personalized energy-saving recommendations.

EXPERIENCE & LEADERSHIP

Deloitte Australia, Data Analytics Job Simulation (Virtual Internship) (Link) Mar 2026

- Applied data analysis and forensic technology skills to a client-style scenario, working end to end.
- Analyzed and visualized business data to draw insights, building a dashboard in Tableau to support decision-making.
- Investigated and classified a dataset in Excel to identify patterns/anomalies, and documented findings and recommendations in a report.

Agricultural Outreach Volunteer (Link)

- Engaged in a comprehensive 7-day farmer awareness campaign across five regional villages, actively engaging with over 150 local farmers.
- Delivered hands-on demonstrations and workshops to promote sustainable organic farming practices and cost-effective vermicompost preparation methods.

Event Management Lead

- Led a team of 6 student volunteers to plan and run a college cultural event for 100+ attendees, managing a budget and end-to-end scheduling.

CERTIFICATIONS

- **Oracle Cloud Infrastructure Generative AI Professional** (Link)
- **SQL Certification, HackerRank** (Link)
- **Java Programming Certification** (Link)
- **Google AI Educators Certification** (Link)
