EDUCATION

NBN Sinhgad School of Engineering, Pune 2022-2026
Bachelor of Engineering in Information Technology

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL, HTML5, CSS
- **Technologies/Frameworks:** React.js, Node.js, Express.js, REST API, MongoDB, Spring Boot, Spring AI
- **Core Subjects:** OOPS, DBMS, Operating System , SDLC, Automation Scripting, Playwright
- **Development Tools:** Git, GitHub, Postman, Docker, VS Code, IntelliJ IDEA, Jupyter Notebook

PROJECTS

TripWise – AI Travel Agent (Demo Video | GitHub) Oct 2026
Tech Stack: Java 21, Spring Boot, Spring AI, Google Gemini API, MySQL, Spring Data JPA, Docker

- Built a conversational AI travel assistant on Spring Boot and Google Gemini that answers natural-language queries across 4 areas: flights, hotels, weather, and trip planning.
- Implemented 4 Spring AI tool functions (flight search, hotel search, weather lookup, itinerary management) so Gemini fetches real-time data instead of guessing answers.
- Developed 3 REST endpoints (save, list, delete) for itineraries, persisted in MySQL via Spring Data JPA, with input validation and centralized exception handling.
- Containerized the app and MySQL with Docker Compose, cutting local setup to 1 command.

BrezzyDrive Rentals – Car Rental Management Platform (Live Demo | GitHub) Jul 2025 – Jun 2026
Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, ImageKit

- Built a full-stack MERN rental platform with 3 core modules (vehicle discovery, booking management, customer reviews), deployed live on Vercel.
- Secured REST APIs with JWT authentication and role-based access control for 2 roles (user, admin) across 4 resource modules: users, vehicles, bookings, and admin operations.
- Built an admin dashboard and integrated 2 cloud services: MongoDB Atlas for scalable data storage and ImageKit for image and media management.

ExpenseTracker – Personal Expense Management App (Live Demo | GitHub) Sept 2026
Tech Stack: MongoDB, Express.js, React.js, Node.js, JWT, Recharts, Tailwind CSS

- Built a full-stack MERN expense tracker with 3 core actions (add, categorize, monitor), deployed live on Vercel.
- Secured user accounts with JWT authentication and built REST APIs covering 4 CRUD operations (create, read, update, delete) for expense management.
- Built a dashboard with 2 features: Recharts category-wise charts and 1-click Excel export of the full transaction history, for an at-a-glance spending overview.

EXPERIENCE & LEADERSHIP

Deloitte Australia, Data Analytics Job Simulation (Virtual Internship) (Link) Mar 2026

- Applied data analysis and forensic technology skills to a client-style scenario, working end to end.
- Analyzed and visualized business data to draw insights, building a dashboard in Tableau to support decision-making.
- Investigated and classified a dataset in Excel to identify patterns/anomalies, and documented findings and recommendations in a report.

Agricultural Outreach Volunteer (Link)

- Engaged in a comprehensive 7-day farmer awareness campaign across five regional villages, actively engaging with over 150 local farmers.
- Delivered hands-on demonstrations and workshops to promote sustainable organic farming practices and cost-effective vermicompost preparation methods.

Event Management Lead

- Led a team of 6 student volunteers to plan and run a college cultural event for 100+ attendees, managing a budget and end-to-end scheduling.

CERTIFICATIONS

- **Oracle Cloud Infrastructure Generative AI Professional** (Link)
- **SQL Certification, HackerRank** (Link)
- **Java Programming Certification** (Link)
- **Google AI Educators Certification** (Link)
