PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience in Software Engineering, Application Development, Full-Stack Web Development, and Machine Learning using Java, Spring Boot, React.js, Node.js, Python, MySQL. Strong foundation in Object-Oriented Programming, JVM Architecture, Software Design, Database Management, RESTful APIs, SDLC principles, and Predictive Modeling. Experienced in designing, debugging, and maintaining scalable software applications, as well as building machine learning solutions through data preprocessing, exploratory data analysis (EDA), model evaluation, and deployment. Proven ability to collaborate in team-based projects, solve complex technical problems, and deliver reliable software solutions. Seeking an entry-level Software Engineer, Machine Learning opportunity to contribute to innovative technology-driven projects.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Machine Learning: Exploratory Data Analysis (EDA), Predictive Modeling, Scikit-Learn, Pandas, NumPy, Matplotlib, Seaborn, Power BI

Frontend Technologies: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS

Backend Technologies: Spring Boot (Spring Security, JWT Authentication), Node.js, Express.js

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Jupyter Notebook

PROJECTS

Smart Electricity Bill Predictor ([Link](#))

Sept 2026

Tech Stack: Python, Scikit-Learn, Flask, Pandas, NumPy

- Developed a machine learning-based web application to predict household electricity bills using appliance usage patterns, monthly consumption hours, and tariff rates.
- Performed data preprocessing, exploratory data analysis (EDA), feature selection, and model evaluation
- Compared Linear Regression, Random Forest, and Gradient Boosting models.
- Built and deployed a Flask-based application with an interactive frontend that provides real-time bill predictions and personalized energy-saving recommendations.

BrezzyDrive Rentals – Car Rental Management Platform ([Link](#))

July 2025-Jun 2026

Tech Stack: MongoDB, Express.js, React.js, Node.js

- Built a full-stack car rental platform enabling users to browse and book rental vehicles online.
- Implemented user registration, login, and role-based access control.
- Developed vehicle search and filtering functionality for improved user experience.
- Created an admin dashboard for managing vehicles, bookings, and users.

EDUCATION

- **Bachelor of Engineering (Information Technology)**

NBN Sinhgad School Of Engineering, Pune

Year of Graduation: 2026

CERTIFICATIONS

- Oracle Cloud Infrastructure Generative AI Professional Certification ([Link](#))
 - SQL Certification by HackerRank ([Link](#))
 - Java Programming Certification ([Link](#))
-
